We can make money with links to this page. CHRISTA LEHMANN/HIDDEN IMAGE From mobile phone cameras came on to the market, it has become even harder for test-drivers when it comes to secrecy. This prototype was left on its way from Ingolstadt in Germany to test cold weather in northern Finland. Audi's upcoming SUV, codenamed Q7, is based on a VW Touareg and has the same wheelbase, but a slightly longer rear end. It should be powered by an Audi 4.2-liter V-8. Look in the autumn of 2005 at the Frankfurt Motor Show. This content is created and managed by a third party and is imported into this page to help users enter their e-mail addresses. You may be able to find more information about this and similar content in piano.io Advertising – Continue reading below among Audi's athletic lineup of tech-laden luxury cars and SUVs, the 2021 Q7 is one of the best family duties. Despite its three-line seats and slightly stodgy style, the Q7 retains the fun-to-drive nature that makes the Audi Audi. Buyers can choose between two-turbocharged engines-248-hp four-cylinder or 335-hp V-6-which both offer a satisfying pep for everything from city trips to highway cruises. The Audi Quattro all-wheel drive system is standard, but the sportier models in the lineup use a well-selective four-wheel steering system and adaptive air suspension to provide an even faster guide. The Q7's main rivals have some of the best luxury triple SUVs to sell today, including the BMW X5, Mercedes-Benz GLE and Volvo XC90. Audi's all-around skill set makes it a strong competitor for all of them - although it's not as downright athletic as the Porsche Cayenne.What's New 2021? After a thorough update of the 2020 model year, the 2021 Q7 sails through little change. Blind spot monitoring behind-cross-traffic alert is now a standard feature and the Premium Model Comfort Package now includes a heated steering wheel and a 360-degree outdoor camera system. Mid-range Premium Plus will receive an optional Executive package that brings together the 2020 model of cold weather, warm weather and driver assistance packages into one. Prestige models now come with leather-wrapped armrests and center consoles and get heated rear seats standard. Pricing and one buyDecision between the turbo-four 45 power unit and the turbocharged V-6 55 option is a tough call-and nothing we're happy to leave up to an individual buyer-but the choice of Premium Plus trim level is a no-brainer. Moving up to the base, Premium Plus adds many niceties, including surround sound stereo system, wireless smartphone charging pad, power-folding exterior mirrors with memory settings, 20-inch wheels, ambient interior lighting and illuminated door table inlays. We also spring with a new Executive Package that includes, among other things, adaptive cruise control, lane keeping assistance, four-zone automatic air conditioning, heated and ventilated 12-way electric front seats, heated rear seats and all weather floor mats. With engine, transmission and performance by 2020, audi will keep the old 248-hp turbocharged four-cylinder, but will be added to the new turbocharged 3.0-liter V-6, which will use a 48-volt hybrid system to make 335 horsepower, and these power units will be performed without changing into 2021. When we tested the 2020 Q7 with the new turbo V-6, we recorded a brisk 5.0-second was slightly faster than a mechanically similar two-lane Q8 SUV. Despite being bulky, when the Q7 is equipped with optional performance tires with 21-inch wheels, it looks low and lithe, like a pumped-up sports wagon. The adaptability of the optional air suspension, which is associated with the added agility of the four-wheel steering, makes the Q7 a surprisingly fun flog down the twisty back road. It also drives quite smoothly. See photos of Audi Fuel Economy and Real-World MPGNot surprisingly, the V-6 power source comes with worse fuel economy. The EPA's fuel efficiency ratings are 17 mpg for the city, 21 mpg on the road and 18 mpg combined, which accounts for drops of 2 mpg across the board compared to the turbo four-cylinder model. If we are able to test the drive for the 2021 Q7, we will put our efficiency test on our 200-mile road fuel economy test route. We expect the four-cylinder Q7 to return similar results to the 2017 model we tested, which gave 26 mpg to our 200-mile road loop. Interior, Comfort and CargoOma minimalist, modern design to match loads of technology and excellent comfort and build quality, the Q7 cabin is a special place. Beautiful materials and design highlight the interior of the Q7, as well as the intelligent layout of its controls and comfortable seats with both ample support and adaptability. Entry-level Premium versions come nicely outfitted, and the amount of expensive features can be extremely luxurious at higher trim levels. Like most three-line SUVs, there is no ton of cargo space in the Audi cargo area when all your seats are in use. But it has free space comparable to its main competitors, and most rear row can be quickly raised or downgraded through power control, which makes up for the somewhat clumsy operation of the middle line. With all the seats positioned, the 2019 Q7 had room for 25 of our handbag cases, the result we expect from the 2021 model to match. See Photos of Audi Infotainment and ConnectivityQ7 with a standard 10.1-inch infotainment touchscreen and a smaller 8.6-inch located below to customize air conditioning and vehicle settings. Depending on whether you like to use touchscreens while driving, you may find the new system appealing or diabolical. Our employees are divided, but Audi has been busy adding this new infotainment system to its lineup; it can be found on the A6, A7 and A8 sedans, as well as the Q8 SUV. All 2021 Q7 models will also come with virtual cockpit digital meter display, 4G LTE Wi-Fi and Apple CarPlay/Android Auto integration. Audiophiles can be enjoyed a number of audio options, topped by bang & amp; olufsen system with 23 loudspeakers and 1920 watts of juice. Safety and driver assistance featuresAdding the 2021 model has not been tested by either agency, earned a five-star National Highway Traffic Safety Administration (NHTSA) for its collision in 2019 and aced the IIHS collision tests. Several are either standard or optional on the Q7, which makes it attractive to buyers carrying this valuable cargo. The main safety features are: Standard Automatic Emergency Braking and Forward Collision Warning Available Lane Departure Warning and Lane Keeping Assistance Available adaptive cruise control with semi-autonomous driving mode Warranty and maintenance CoverageQ7 carries a solid warranty coverage comparable to its peers, although the Acura MDX and Lexus GX both offer slightly better transmission coverage. Its free planned maintenance plan – one year or 10,000 miles – is a lonely area where it falls behind the coverage of its main competitor, XC90. The limited warranty covers 4 years or 50,000 miles with a Powertrain warranty covering 4 years or 50,000 miles Free maintenance is covered in 1 year or 10,000 milesMore features and specs specs
