## Luke cage season 2 guide

Marvel Studios has had successes since the launch of the Marvel Cinematic Universe in 2008, and their run of Netflix shows is no exception. It began with them launching Daredevil's best interpretation of Daredevil, then critical acclaim for the first adaptation of Jessica Jones. The streak continued greatly with Luke Cage in the autumn of 2016, and we couldn't be more excited to see the bulletproof hero return to action for a second season. Luke Cage Season 2 is undoubtedly one of the many eggs Marvel Studios are currently juggling, but, like many of you, we're hungry for details. What can we expect in terms of storytelling? How would it fit in the world after the shields? What characters can we expect to return, and who will be shown? To follow up on all the answers to these questions and more, we've amassed this volatile guide of what we know so far. Keep reading and learn a little bit about the second season of Luke Cage! Fortunately, we were finally treated to the first full trailer from the second season of Luke Cage, and it has everything we could have hoped for. We got a look at Bushmaster (a new villain for the upcoming season), Misty's sparkly new bionic arm, tough fights, fire and lots of poor, innocent hoodies destroyed left and right. Even after introducing him to the audience in the first season of Jessica Jones, Luke Cage remained largely a mystery going into his solo series - and much interesting information was revealed about his history in those 13 episodes. Not only have we seen the origin story of his superhero playing himself - with Carl Lucas undergoing prison trials that will make his skin impenetrable - but we've even learned about his Atlanta upbringing and some dark secrets revealed about his father and convent family. Of course, that doesn't mean that the lid has been fully pulled on Luke Cage, and we have much more to learn about the character and where he was (for example, we still don't know anything about the incident that landed him in prison in the first place). And in the results of defenders, Luke Cage will be a full hero in Harlem with quite a fan club by his side. Returning to Luke Cage's part will be Mike Coulter, who has become a favorite among followers. Before joining the Marvel Cinematic Universe, he had significant roles on shows such as *Next* and *The Good Wife*, but has now been fully linked to his superhero role, and fans are excited to see him return to the role. Taking the reins of Luke Cage, TV veteran Coo Hodari Cocker was given the chance to leave a very individualistic stamp on what a superhero show might be - and he very much did it. The music used in each episode is as influential as the work James Gunn did on *Guardians of the Galaxy*, and the stories explore new and different ways we haven't seen before in the genre. And from the trailer, it looks like you're going to treat us more music, along with cool plot lines and villains. This is likely due in no small part to the fact that Walker will return to steer the bulletproof ship in season two. When Marvel and Netflix announced we'd be doing Season 2 of Luke Cage, it came on behalf of a video that just indicated that another set of episodes would be coming soon. Although it took a while for the show to confirm that the lead actors on camera and behind it would return for the new season, the response to the first season was so positive (overall) that it was always hard to imagine anyone being replaced. Aside from the controversial decision to kill Cotton and Mouth Stokes mid-season, people liked what Coeur and his team did with the characters. As such, it's great that Cocker is, once again, responsible. In the first season of Luke Cage, the audience watched the titular hero rooted in Harlem, tried to stop the corruption that had taken hold of him, and had an epic personal quarrel with his half-brother. As for what we're going to do for season two... We really don't know. From the recently released trailer we can glean that Lok is the big man around Harlem these days, with dozens of people publicly adoring him. We also see that Maria Dillard, who managed to turn some of New York's most influential men against the bulletproof hero, is back and something's wrong. And while the Diamondbacks are in custody instead of dead, and it's entirely possible that he could make a comeback, the bigger threat seems to be the new villain Bushmaster, who is a little bulletproof himself. While we'll get more into it later in this feature, one presence that can surely shake things up after defenders is Danny Rand and also Danny Rand also punched the iron. In the comics, Luke Cage and the kung fu hero are not only best friends, but also co-owners of a heroes-for-hire business - and that's something Bobby Fish (Ron Chaps Jones) Block Cage season 1 hinted at. After the two men met at the Shields, it sounded like they were continuing to spend the second season of Luke Cage. Mike Coulter has confirmed that we will get at least a taste of the heroes' dynamics for hire with the new members, which is something fans have been looking forward to. Misty Knight went on to become one of the worst heroines in the Marvel universe, and that tradition was drawn by Simone Misick in the making of Luke Cage season 1. Introduced as a hard-worked detective in Harlem, she proved to be a key asset to the show's titular character and for justice in her New York District. And the trailer completely confirms that she will return to Luke Cage Season 2. So, what's Misty Knight going to do on season two of the superhero show? There were a lot of people who wanted to see her lose her right arm, and they got what they wanted at the end of the shields. In the comics, the character is famous with a limb in June courtesy of Tony Stark after she loses her arm while in the line of duty. It was teased big time during Season 1, but the defenders gave people what they wanted when Misty lost her arm in a fight with a friend holding Katana in a hand. Maybe her new super limb will help her take on an old high school rival who ends up taking on her job at the precinct. We'll just have to wait and see. Luke Cage faced three very different types of villains in the first season of his series. Cornell Cotton of Death Stokes (Mahershala Ali) was a master of crime - using his ties to politics and crime to flood the streets of Harlem with drugs and weapons. And then there was Diamondback - a psychotic killer with a personal vendetta. The third was Adréra Woodard's Maria Dillard - who used her influence and power to incite the world against the faithful hero. While Luke managed to outlive Cottonmouth and defeat the Diamondback, it was Dillard who eventually claimed victory by the time the 13th episode was over, not only getting away with murder, but watching as Luke was taken back to prison. Right now, we can't say for sure where we're going to find Maria Dillard in Season 2 of Luke Cage, but we're going to make a jump and all that except to ensure she has a dangerous role to play. Given her big win in season one, it's not hard to imagine Luke Cage returning to Harlem and doing everything he can to make sure she's taken and thrown in jail. Of course, we expect that this narrative to be combined with some fresh threads that will last throughout the season. Maria Dillard mostly carved the way to victory in Luke Cage's first season, but much of the credit stems from Theo Rossi's Alvarez variety for successfully reading the tea leaves. While he was initially just a Diamondbacks agent sent to keep an eye on Cottonmouth, he got a very strong whiff of the way the tide turned after Maria killed her cousin, establishing his true alliances. Expect shades to still be attached to her thigh during Season 2. Shades is definitely a character we want to see more of in the second season of Luke Cage. During the first 13 episodes, he played a role in Littlefinger's role in manipulating the various chess pieces on the board, but we didn't get to see him really go for the brass ring. He reached a low point when Claire Temple kicked his ass and Misty Knight before he was taken to jail, but he returned to the streets at the end of Season 1, and it will be interesting to see what damage he can do with Maria Dillard backing up his every move. Willis Striker's Eric Laray Harvey also caused quite a bit of chaos in Luke Cage's first season, not only displaying a weapon that could legitimately kill the hero, but also carrying out a plan for revenge he had been planning for years. Unfortunately for him, his specially designed armor wasn't enough to defeat the bulletproof hero, and he was taken by the police to be thrown in jail. The Diamondbacks may be locked up, but there's every chance he could still end up having a massive impact and presence in Cage Season 2 (just look what Daredevil did with Kingpin). We still want to know the details of how he managed to get Luke Cage thrown in jail in the first place. He probably won't be at the Luke Cage Season 2 Center, but we're still totally looking forward to the Diamondbacks doing some kind of performance in an episode or two. So far, Rosario Dawson's Claire Temple has been the glue that kept all Marvel's Netflix shows together, and her role in Luke Cage's Season 1 was her biggest since Daredevil season 1. On the 2016 show, Temple not only saved Cage's life, but they both started a romantic relationship, and it still seems to be going strong until the new season rolls around. But, what else should we expect from her? Luke Cage Season 2? Luke Cage's latest Season 2 trailer doesn't give us much in the way of Claire's plot beyond being entirely on the side of her bulletproof boyfriend, but it's hard to imagine Rosario Dawson not getting a part in a story that's bigger than that in the next season of the show. Whatever happens on the romantic side, it's always a good thing to have a medic around when Luke Cage does his hero business. And we know Claire was never afraid to get her hands dirty when she feels wronged, so she's likely to get in on the act in her own right. Luke Cage encounters a strong physical opponent in season one and the new season will be no different. This time, he'll have to deal with John McKayber, too. Bushmaster, who seeks revenge against those who have done bad things for Harlem (and, and, as you might expect, though his cause sounds worthy, is not going to be subtle. In the comics, Bushmaster was a crime boss who went through the same experiments as Luke Cage, and from what we see him stopping bullets with his chest in a trailer, he certainly looks like a superhero. We also see that Bushmaster can really give Luke an unexpected beating, so to see these two fighting is sure to be intense. Unfortunately for Luke, even though Tilda is a holistic doctor from Harlem, she may not be by his side for much, if any, of the new season. In the comics, this scientific genius always managed to find it hard to find her, eventually becoming a crime lord named Nighthawk. In recent years, the character has found her calling as a heroine, now named Nighthawk, but it's unlikely we'll see the character fill up in a circle in just one season. Right now, we haven't been given any details on how it's going to fit into Season 2, so we're going to have to wait and see. Season two throws another bad guy at Luke Cage, and it sounds like someone who can give Maria Dillard a big shot for her money. Rosalie Carbone is described as a dangerous criminal power player downtown who has some big plans for Harlem, and we can only assume Plans will put Luke (and possibly the rest of Harlem) on high alert. In the comics, Rosalie took over her crime family after her father's death and when her uncle disappeared, then this villain (who usually cradles the Punisher) is certainly well connected and expected to do a lot of damage if Luke can't stop her plans. Programs.
